INTRODUCTION OF THE SPEAKER-

Dr. Chinmay Pandya- Dr. Chinmay Pandya is grandson of one of the greatest scholars, seers, philosophers of recent times in India – Pt. Shriram Sharma Acharya (1911-1990), who was the founder of All World Gayatri Pariwar fraternity, which has 100 million members and thousands of global centers for social reform. He currently serves as Pro Vice Chancellor of Dev Sanskriti Vishwavidyalaya University (DSVV). In London, he rose through the ranks of the British National Health Service and secured the post of Associate Specialist in Older People Services at the West London Mental Health Trust.

INTRODUCTION-

Human Excellence System will be designed to drive the human mindsets and the granular human behaviours that are needed for humans to excel at doing the tasks that technology will not be able to do well the higher order thinking critically, creatively and innovatively and high emotional engagement with other human beings. And as importantly, it will be designed to mitigate the two big inhibitors of human excellence: ego and fear, by creating psychological safety.

HUMAN EXCELLENCE IN SAINTS AND GREAT LEADERS

The world and India have seen several saints and prophets. When almost all of them talked about God, Swami Vivekananda and Aristotle insisted on man.

Swami Vivekananda-The main theme of Swami Vivekananda lectures, private talks, writings, letters, etc. was Human Excellence. The person who has achieved the utmost excellence in his life is a man of harmony. Usually, we meet two kinds of noble people – the meditative introverted renunciate

and the ever-active social worker. Human Excellence can be broadly classified as Social Excellence and Spiritual Excellence. Social Excellence requires three qualities –

1. Knowledge of ways to uplift mankind
2. Capacity to put the knowledge into practice, and most importantly
3. Strength of conviction.

According to Swami Vivekananda, every individual is unique and the character is his identity. Building up character is through the process of education. Education is not only the process of acquiring knowledge. This education combines with strength of self-conviction and the depth of thought enables a person to reach character excellence. Only those people with a high degree of character excellence can nourish this world. According to Upanishad, anything done with vidya, sraddha and Upanishad can alone become supremely efficient. When all these three powers are combined you get a superlative degree of efficiency which he terms as human excellence. The study concludes that the best examples of the Human excellence he presents are Swami Vivekananda himself as Sri Krishna taught in Bhagavad Gita. Swami Vivekananda was a perfect blend of Social and Spiritual Excellence. By following his teachings, we also can strive to inculcate these concepts in our life and attain both these aspects of Human Excellence.

Aristotle-Aristotle was a Greek philosopher and polymath during the Classical period in Ancient Greece. Aristotle's views on physical science profoundly shaped medieval scholarship. Aristotle Excellence Quote:

- Excellence is a habit.
- Excellence is possible in all areas of your life.
- A constitution is the arrangement of magistrates in a state.
- A friend to all is a friend to none.
- A likely impossibility is always preferable to an unconvincing possibility.
- All human actions have one or more of these seven causes: chance, nature, compulsions, habit, reason, passion, desire.

Reading his quotes will help us to realize that we are not the only one who works hard to achieve our goals. It also reassures us that hard work will never betray us. He believes a sincere effort will result in achievements. Up to nowadays, Aristotle excellence quote has transformed the system of philosophy. Reading his words gives us more insights about happiness, friendship, and many other forms of relationship. Thus, we can learn about how to respect ourselves and others too.

Human Excellence in the smart machine age

A new way of working, a different enabling work environment, a different leadership model with different leadership traits, and the creation of a Human Excellence System will be required, and a system that enables continuous human development cognitively and emotionally, which enables high quality conversations that can lead to collective flow that leads to teaming excellence Human adaptation, mental agility and the ability to continuously create, innovate and iteratively learn very

quickly will become strategic differentiators. Speed and quality of iterative learning will be key. we call that high-speed, high-quality learning “HyperLearning.” Hyper-Learning will require Human Excellence. Human Excellence requires both mastery of self and teaming excellence — the ability to have continual high-quality conversations that result in “collective flow” that enables the highest levels of human performance cognitively and emotionally.

WAYS TO ACHIEVE HUMAN EXCELLENCE-

1. Do not just communicate about the task itself

At work we are very focused on our tasks and the results we want to achieve. The path reaching to the ultimate summit of human options and human possibilities is called as “HUMAN EXCELLENCE”

2. Connect with people

Well running organizations and good results are achieved through strong connections between the different components of that organization, People often talk to each other from their own point of view. They have a strong opinion which is often difficult to change

3. Know your talents and pitfalls

In everyday life you sometimes forget whether you fully use your talent. Doing too many things outside your comfort zone consumes energy. The reason we cannot see the ancient masterpiece persons in this daily life is that people cannot focus on single thing for a long time.

4. Take your responsibility. Anytime, anywhere

It is not always easy to take full responsibility at any given moment. But it does mean less stress. Many people are lagging with making decisions what is right what is wrong.

5. Choose with your mind and your heart

Rational choices are often good choices but not always the best. Sometimes your heart says something different than your head

6. Give others the opportunity to learn

‘Knowing better’ is tiring and very often you are not even right. The compassionate person is capable of evolving from feelings of charity and compassion towards a sense of justice and solidarity, which favours their contribution to changing the unjust social structures of the world they live in.

Conclusion –

we can conclude that human excellence is a contributing factor for everything that is happening around the whole world so all must work hard to ensure its development. The main motive of human excellence is to live the life with a meaningful purposeful agenda.
